

1 Levels 4, 5, and 8, consisting of a plurality of rows of laterally adjacent abutted sheets of UL
2 listed ballistic fibreglass, each of which sheets of fibreglass has a UL listing of any of UL
3 Level 1, Level 2, and Level 3, wherein the laterally abutted sheets of fibreglass from any one
4 row are laterally spaced from the abutments of the sheets of the next forward or next rearward
5 row of latterly adjacent abutted fibreglass sheets;

6 said rows sheets being fastened together solely by fasteners passing through all
7 of the rows of the plurality of rows of ballistic fibreglass.

8 Please add new claim 12,

9 12. The ballistic zone of protection wall of claim 11 further including drywall on at
10 least one side of the ballistic zone of protection wall.

11 Cancel claim 8 and replace with claim 13,

12 13. A ballistic resistant zone of protection wall having a resistant level of any of UL
13 Levels 4, 5, and 8, consisting of a plurality of rows of laterally adjacent abutted sheets of UL,
14 listed ballistic fibreglass, each of which sheets of fibreglass has a UL listing of any of UL
15 Level 1, Level 2, and Level 3, wherein the laterally abutted sheets of fibreglass from any one
16 row are laterally spaced from the abutments of the sheets of the next forward or next rearward
17 row of latterly adjacent abutted fibreglass sheets;

18 said rows of sheets being fastened together solely by fasteners passing through all of
19 the rows of the plurality of rows of ballistic fibreglass;

20 said rows sheets being fastened together solely by fasteners passing through all
21 of the rows of the plurality of rows of ballistic fibreglass,

22 and wherein the rows of fibreglass are formed of sheets having at least any two of the
23 three levels of UL level 1, 2, and 3 ballistic protection,

24 and wherein the highest level of protection sheet(s) are disposed as the innermost
25 level(s) of each row of sheets of fibreglass forming the protection zone.
